WORK EXPERIENCE

Web Developer TitanFlow

10/2020 - 04/2022

A start-up that provides an app-based trading platform which helps users make informed decisions with real-time data on options order flow.

- Utilized Figma prototypes to build and update product website using React, JavaScript, and CSS
- Implemented a responsive layout to ensure an engaging and user-friendly interface across all screen sizes and devices
- Streamlined development processes using GitHub issue tracking, resolution, and actions to establish a smooth, continuous deployment workflow to GitHub Pages

Clinical Manager SeattleNTC

09/2018 - 10/2023

Neuropsychiatric Treatment Center providing effective and life-saving treatments for depression including TMS, ECT and Ketamine Therapy.

- Managed a team of 21 TMS technicians while fostering team cohesion, maintaining a patient centered environment, and providing well-structured feedback
- Led weekly staff meetings with a focus on team understanding of clinic updates, collaborative problem solving, and highlighting excellent work
- Coordinated clinic schedules to support clinic operations, ensure appointment availability, and provide high-quality patient care
- Completed interviews, onboarding, and training procedure for 18 team members to staff new clinics and open additional treatment rooms
- Standardized office workflows to increase productivity and implemented identical, streamlined processes across all five clinics
- Organized five clinic-wide trainings to keep staff current on accurate treatment delivery, safety measures, and emergency protocols
- Maintained and created new content for clinic's website, using WordPress, to ensure accurate and up-to-date representation of services, treatments, clinic policies, and clinician expertise
